Version 5  
9 May 2024

# Statistical report— Annual Wage Review 2023–24

All Australian Bureau of Statistics (ABS) data in this report are seasonally adjusted, unless otherwise noted.

All data expressed in \$ units are in nominal terms, unless otherwise noted.

All gross domestic product (GDP) and gross value added (GVA) measures used in this Report are expressed in real terms from chain volume estimates, unless otherwise noted.

This report uses unit record data from the Household, Income and Labour Dynamics in Australia (HILDA) Survey conducted by the Melbourne Institute of Applied Economic and Social Research at the University of Melbourne on behalf of the Australian Government Department of Social Services (DSS), with data collection conducted by Roy Morgan Research. The findings and views reported in this paper, however, are those of the authors and should not be attributed to the Australian Government, DSS, or any of DSS' contractors or partners. [DOI: 10.26193/SJEPRM](https://doi.org/10.26193/SJEPRM).

**Chart 1.5: Household savings ratio**

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2023.

**Chart 1.6: Household spending, annual growth, current price, calendar adjusted**

Note: Calendar adjusted estimates account for trading day impacts and length of month. As the indicator time series lengthens, seasonally adjusted estimates will become available.

Source: ABS, *Monthly household spending indicator*, March 2024.

## 2. Productivity

**Chart 2.1: Measures of productivity, indexes—Dec-13 = 100**

Note: Labour productivity is measured as real GDP per hour worked. Gross value added measures the value of output at basic prices minus the value of intermediate consumption at purchasers' prices. The market sector includes all industries except for Public administration and safety, Education and training and Health care and social assistance.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2023.

**Table 2.1: Productivity growth and its components, growth rate over the year**

Quarter	Total			Market Sector		
	GDP	Hours worked	GDP/ hour worked	GVA	Hours worked	GVA/ hour worked
	(% change)	(% change)	(% change)	(% change)	(% change)	(% change)
Dec-13	2.5	0.6	2.0	2.4	0.4	2.0
Dec-14	2.1	0.3	1.7	2.2	-0.1	2.3
Dec-15	2.7	2.4	0.3	2.6	1.8	0.9
Dec-16	2.7	0.9	1.8	2.1	-0.1	2.3
Dec-17	2.4	3.1	-0.7	2.5	3.6	-1.2
Dec-18	2.5	1.8	0.7	2.1	0.7	1.4
Dec-19	2.0	1.5	0.3	1.5	1.5	0.0
Dec-20	-0.4	-2.6	2.4	-1.4	-4.5	3.2
Dec-21	5.4	2.8	2.5	5.1	2.2	3.0
Dec-22	2.4	7.1	-4.5	3.2	8.5	-4.9
Dec-23	1.5	2.0	-0.4	1.5	0.3	1.2

Note: The percentage changes are calculated in relation to the corresponding quarter of the previous year.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2023.

**Chart 2.2: Productivity cycles, average annual growth in the market sector**

Note: Multifactor productivity is measured as output per combined unit of labour and capital. Capital deepening is the component of labour productivity growth which is due to the increase in the amount of capital that each unit of labour has to work with. Labour productivity is represented by the numbers above the bars and is the sum of multifactor productivity and capital deepening. Due to rounding, the sum of multifactor productivity and capital deepening may not equal labour productivity. The current productivity cycle from 2021-22 is incomplete.

Source: ABS, *Australian System of National Accounts*, 2022-23 financial year; ABS, *Estimates of Industry Multifactor Productivity*, 2022-23 financial year.

**Chart 2.3: Unit labour costs, index**

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2023.

# 3. Business competitiveness and viability

**Chart 3.1: Profits and wages shares of total factor income**

Note: Profits share represents the returns to capital in the process of production and is expressed as total corporation gross operating surplus as a proportion of total factor income. Wages share represents the returns to labour in the process of production and is expressed as total compensation of employees as a proportion of total factor income. Does not include income from production by unincorporated enterprises.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2023.

**Table 3.1: Profits and wages shares of total factor income, year on year growth rates**

Quarter	Wages share of total factor income	Total compensation of employees	Profits share of total factor income	Total corporation gross operating surplus	Gross mixed income	Gross mixed income
	(%)	(% change)	(%)	(% change)	(%)	(% change)
Dec-13	52.8	3.5	27.6	5.9	8.7	5.2
Dec-14	53.6	2.9	25.5	-6.5	9.8	13.3
Dec-15	54.6	3.1	24.4	-3.0	9.5	-1.8
Dec-16	52.3	2.1	26.4	15.7	10.0	12.6
Dec-17	53.1	5.2	26.3	3.0	9.3	-3.2
Dec-18	52.4	4.9	27.5	11.3	8.8	0.4
Dec-19	52.8	5.3	27.8	5.7	8.2	-3.2
Dec-20	51.3	2.8	28.7	9.1	9.2	18.5
Dec-21	50.9	7.1	30.0	12.9	8.5	0.2
Dec-22	50.4	10.2	31.9	18.3	7.5	-1.3
Dec-23	52.4	8.4	29.9	-2.3	6.6	-8.6

Note: Wages share is the compensation of employees expressed as a proportion of total factor income. Compensation of employees is defined as the total remuneration, in cash or in kind, payable by an enterprise to an employee in return for work done by the employee. Compensation of employees is not payable in respect of unpaid work undertaken voluntarily, including the work done by members of a household within an unincorporated enterprise owned by the same household. Compensation of employees excludes any taxes payable by the employer on the wage and salary bill (e.g. payroll tax).

Profits share represents the returns to capital in the process of production and is expressed as total corporation gross operating surplus as a proportion of total factor income. Gross operating surplus is defined as the operating surplus accruing to all enterprises, except unincorporated enterprises, from their operations in Australia. It is the excess of gross output over the sum of intermediate consumption, compensation of employees, and taxes less subsidies on production and imports. It is calculated before deduction of consumption of fixed capital, dividends, interest, royalties and land rent, and direct taxes payable, but after deducting the inventory valuation adjustment. Gross operating surplus is also calculated for general government and is equal to general government's consumption of fixed capital.

Gross mixed income is defined as the surplus or deficit accruing from production by unincorporated enterprises. It includes elements of both compensation of employees (returns on labour inputs) and operating surplus (returns on capital inputs).

The percentage change is calculated in relation to the corresponding quarter in the previous year.

**Chart 3.6: Monthly retail turnover growth, current prices**

Source: ABS, *Retail Trade, Australia*, March 2024.

**Chart 3.7: Change in quarterly retail turnover, by industry group**

Note: Data are expressed in chain volume terms.

Source: ABS, *Retail Trade, Australia*, March 2024.

**Chart 3.8: Producer Price Index (final demand) and Consumer Price Index, annual growth**

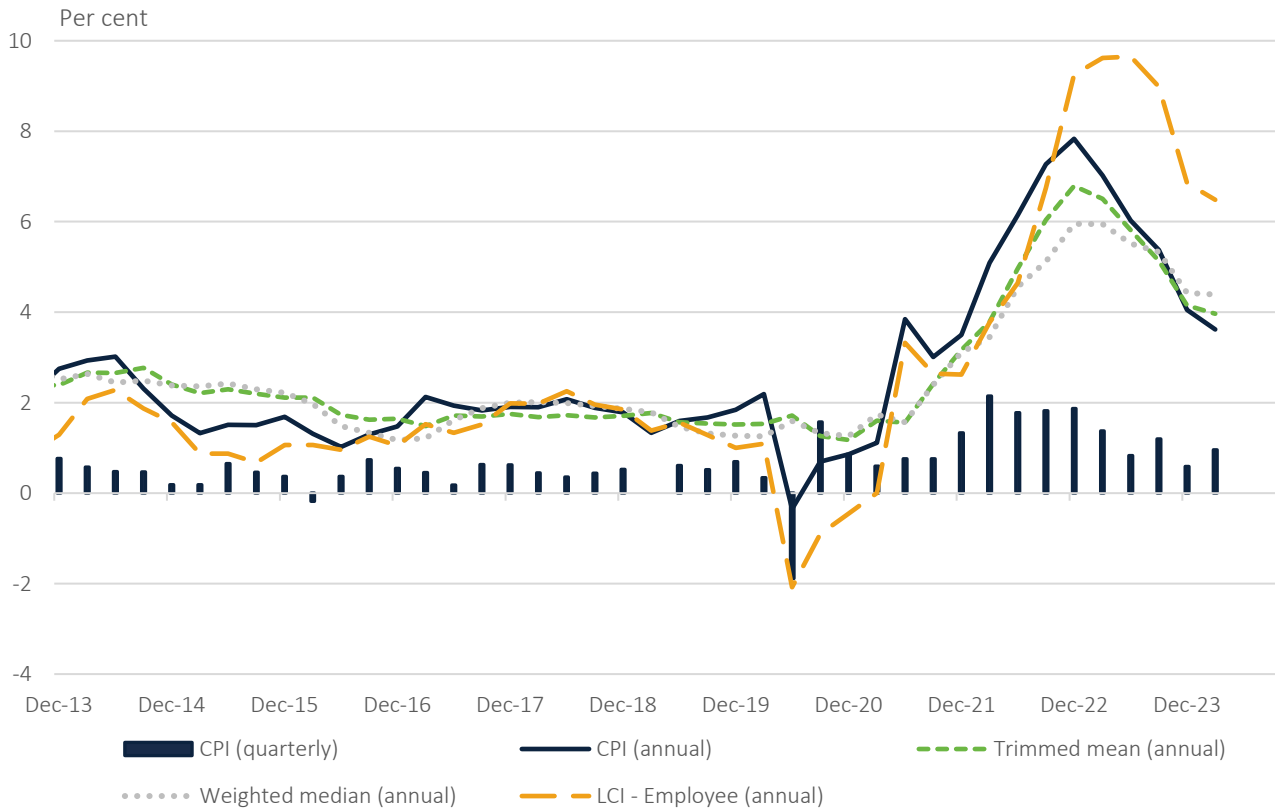

Note: Producer Price Indexes measure price change from the perspective of the industries that produce goods and services, whereas the CPI measures price change from the perspective of consumers. Final demand measures the price change of products (goods and services) consumed with no further processing.

Source: ABS, *Producer Price Indexes, Australia*, December 2023; ABS, *Consumer Price Index, Australia*, December 2023.

# 4. Inflation

**Chart 4.1: Measures of inflation—Consumer Price Index, underlying inflation and Living Cost Index for employee households, growth rates**

Note: The Consumer Price Index (CPI) measures quarterly changes in the price of a 'basket' of goods and services which account for a high proportion of expenditure by the CPI population group (i.e. metropolitan households). The trimmed mean is calculated by ordering the CPI expenditure class components by their price change in the quarter and taking the expenditure weighted average of the middle 70 per cent of these price changes. The weighted median is the price change of the component in the middle of this ordering. The Living Cost Index (LCI) for employee households measures the change in the price of a 'basket' of goods and services which is based on the expenditure of employee households whose principal source of income comes from wages and/or salaries. CPI and LCI data are expressed in original terms.

Source: ABS, [Consumer Price Index, Australia](#), March 2024; ABS, [Selected Living Cost Indexes, Australia](#), March 2024.

**Chart 4.2: Measures of annual CPI growth, monthly and quarterly series**

Note: Data are expressed in original terms. The monthly CPI indicator represents up-to-date prices for between 66 and 77 per cent of the weight of the CPI basket, depending on the month in the quarterly cycle.

Source: ABS, *Consumer Price Index, Australia*, March 2024; ABS, *Monthly Consumer Price Index Indicator*, March 2024.

**Table 4.1: Consumer Price Index, underlying inflation, Living Cost Index for employee households, index and growth rate over the year**

# 5. Wages

**Chart 5.1: Measures of nominal wages growth, quarterly and cumulative growth rates, index**

Note: The Wage Price Index (WPI) is an index for total hourly rates of pay excluding bonuses that is unaffected by changes in the quality or quantity of work performed. Average weekly ordinary time earnings (AWOTE) is calculated by dividing estimates of weekly ordinary time earnings by estimates of the number of employees. Ordinary time earnings refer to earnings attributable to award, standard or agreed hours of work. It is calculated before taxation and other deductions such as superannuation. It also excludes payments which are not related to the reference period such as overtime, leave loading and redundancy payments. AWOTE estimates refer to full-time adult employees, where an adult is defined as those who are 21 years or over as well as employees who, although under 21 years of age, are paid at the full adult rate for their occupation. AWOTE data are published half-yearly in May and November and a quarterly series has been derived. AWOTE data are expressed in original terms. Average annualised wage increase (AAWI) measures the average percentage increase in the base rates of pay across federal enterprise agreements approved in each quarter. It does not take into account payments such as allowances, bonuses and increases linked to productivity. The AAWI index is calculated by first deriving a quarterly rate. The C14 and the C10 are minimum award rates set under the *Manufacturing and Associated Industries and Occupations Award 2010* and the *Manufacturing and Associated Industries and Occupations Award 2020*. From 1 July 2023, the NMW was aligned with the C13 rate. Prior to this it was aligned with the C14 rate.

Source: ABS, *Average Weekly Earnings, Australia*, November 2023; ABS, *Wage Price Index, Australia*, December 2023; Department of Employment and Workplace Relations, *Trends in Federal Enterprise Bargaining*, December quarter 2023; *Manufacturing and Associated Industries and Occupations Award 2010*; *Manufacturing and Associated Industries and Occupations Award 2020*.

Note: The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. All measures are calculated for persons aged 15 years and over. The percentage change and percentage point (ppt) change are calculated in relation to the corresponding month in the previous year.

Given large month-to-month changes during the COVID-19 pandemic period, resulting in multiple trend breaks, the ABS recommends caution when using trend estimates during this period.

Therefore, seasonally adjusted data are presented in this chapter.

## 8. Relative living standards

**Table 8.1: NMW relative to median weekly earnings of full-time employees**

Period	NMW	Median earnings of full-time employees in main job	Ratio of NMW to median earnings in main job
	(\$)	(\$)	(%)
Aug-13	622.20	1153	54.0
Aug-14	640.90	1208	53.1
Aug-15	656.90	1233	53.3
Aug-16	672.70	1250	53.8
Aug-17	694.90	1284	54.1
Aug-18	719.20	1343	53.6
Aug-19	740.80	1380	53.7
Aug-20	753.80	1430	52.7
Aug-21	772.60	1498	51.6
Aug-22	812.60	1508	53.9
Aug-23	882.80	1600	55.2

Note: Employees include owner managers of incorporated enterprises. Median earnings refer to the level of earnings that divides the distribution into two groups of equal size, one having earnings above and the other below that amount. The median is less affected by outliers and skewed data than the mean. The median earnings data reflects revised estimates as a result of a rebenchmarking of estimates. Median earnings are presented to the nearest dollar.

Source: ABS, *Characteristics of Employment, Australia*, August 2023; Fair Work Commission annual wage review decisions.

**Table 8.2: Two-thirds of median weekly earnings**

Year	COE	EEH
2013	768.67	n/a
2014	805.33	880.00
2015	822.00	n/a
2016	833.33	917.33
2017	856.00	n/a
2018	895.33	973.33
2019	920.00	n/a
2020	953.33	n/a
2021	998.67	1062.00
2022	1005.33	n/a
2023	1066.67	1131.33

Note: Employees include owner managers of incorporated enterprises. Data for both measures of median weekly earnings include amounts salary sacrificed. Weekly earnings from the COE are earnings in the main job for full-time employees and are for August of each year. Weekly earnings from the EEH are weekly total cash earnings for full-time non-managerial adult employees for May of each year. n/a = not available.

Source: ABS, *Characteristics of Employment, Australia*, various; ABS, *Employee Earnings and Hours, Australia*, various.

**Chart 8.1: Real weekly total earnings (full-time adult non-managerial employees) by percentile and the real NMW, index**

Note: EEH earnings data for 2014, 2016, 2018, 2021 and 2023 at May of each year. Real earnings based on CPI at June of each year. NMW aligned to C14 rate during this period.

Source: ABS, *Employee Earnings and Hours, Australia*, various.

**Chart 8.2: C14/NMW\* rate relative to median earnings of employees in main job**

Note: \*Following the amendments to the *Workplace Relations Act 1996* (Cth) taking effect in 2006, the Federal Minimum Wage was set at \$12.75 per hour, equivalent to \$484.50 per week. The NMW was aligned with the C13 rate from 1 July 2023.

Median earnings are measured in August of each year. Median earnings from 2004 onwards are taken from the COE survey, with median hourly earnings of adult employees sourced from unpublished COE data. Earnings are for employees including owner managers of incorporated enterprises.

The median earnings data reflect revised estimates as a result of rebenchmarking.

Source: ABS, *Characteristics of Employment, Australia*, various; ABS, *Employee Earnings, Benefits and Trade Union Membership, Australia*, various; ABS, *Weekly Earnings of Employees (Distribution), Australia*, various; *Metal, Engineering and Associated Industries Award 1998*; *Manufacturing and Associated Industries and Occupations Award 2010*; *Manufacturing and Associated Industries and Occupations Award 2020*.

**Table 8.4: Nominal disposable income of selected NMW-reliant households**

Household type	Disposable income	Change		
	July 2023	July 2022 to July 2023		July 2018 to July 2023
	(\$pw)	(\$pw)	(%)	(%)
Single adult	767.55	50.21	7.0	18.5
Single parent working FT, 1 child	1072.77	72.40	7.2	18.1
Single parent working PT, 1 child	725.06	51.99	7.7	19.7
Single parent working FT, 2 children	1196.32	81.29	7.3	18.0
Single parent working PT, 2 children	848.61	60.88	7.7	19.2
Single-earner couple (with NSA/JSP)	1002.55	58.82	6.2	21.4
Single-earner couple	781.24	50.18	6.9	18.0
Single-earner couple, 1 child (with NSA/JSP)	1217.69	75.77	6.6	19.9
Single-earner couple, 1 child	1072.77	72.40	7.2	18.1
Single-earner couple, 2 children (with NSA/JSP)	1348.99	85.18	6.7	20.2
Single-earner couple, 2 children	1196.32	81.29	7.3	18.0
Dual-earner couple	1205.05	81.41	7.2	19.6
Dual-earner couple, 1 child	1405.61	93.23	7.1	17.7
Dual-earner couple, 2 children	1529.16	102.12	7.2	17.6
<b>CPI</b>	-	-	<b>6.0</b>	<b>18.3</b>

Note: The percentage change in the CPI over July 2022 to July 2023 and July 2018 to July 2023 were calculated with reference to the June quarter. The CPI is expressed in original terms.

Assumptions: Single-earner households earn 100 per cent of the weekly NMW. Single parents working part time (PT) earn 50 per cent of the weekly NMW, those working full time (FT) earn 100 per cent. Dual-earner households comprise one partner earning 100 per cent of the NMW, the other earns 50 per cent. Applicable NMW rates per week are: \$719.20 in July 2018; \$812.60 in July 2022 and \$882.80 in July 2023.

Tax/transfer parameters as at July each year. Disposable income includes all available income transfers, unless otherwise specified. Children are aged 8–12 years and attending primary school. Households paying sufficient rent to receive maximum Rent Assistance where applicable. From 20 March 2020 the Newstart Allowance (NSA) was replaced by the JobSeeker Payment (JSP). Single-earner couples are modelled in two scenarios: 1) the non-earning partner is in the labour force and receiving proportional rates of NSA or JSP and 2) the non-earning partner is not in the labour force and therefore not in receipt of NSA or JSP. Single-parent households and secondary earners in dual-earner households are not seeking further work and not in receipt of income support.

Source: ABS, *Consumer Price Index, Australia*, March 2024; Fair Work Commission modelling.

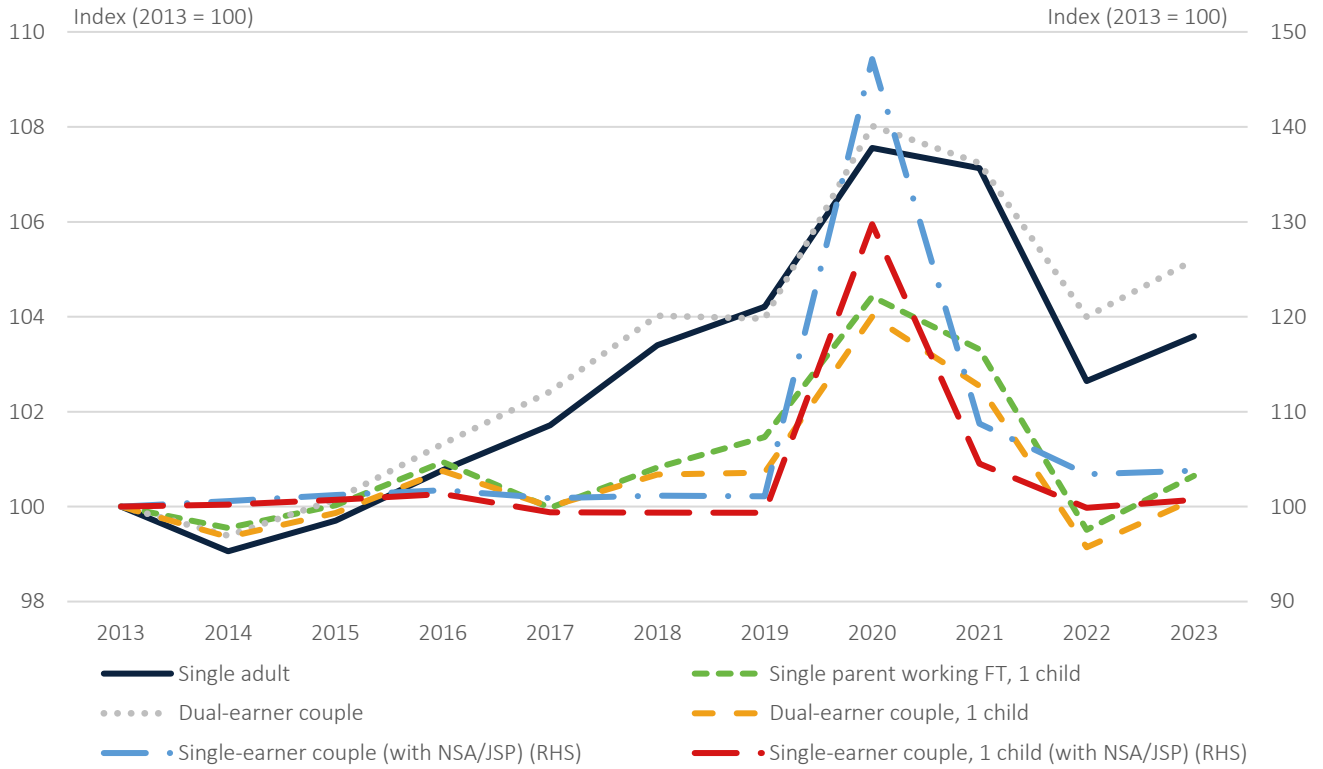

**Table 8.5: Modelling the 2023 NMW increase, wage increase retained and components of change in disposable income of selected NMW-reliant households, July 2023**

Household type	Change in disposable income	Components of change			NMW increase retained
		Wage increase	Taxes	Transfers	
	(\$pw)	(\$)	(\$)	(\$)	(%)
Single adult	50.21	70.20	-19.99	0.00	71.5
Single parent working FT, 1 child	51.61	70.20	-18.59	0.00	73.5
Single parent working PT, 1 child	31.20	35.10	-3.90	0.00	88.9
Single parent working FT, 2 children	51.61	70.20	-18.59	0.00	73.5
Single parent working PT, 2 children	31.20	35.10	-3.90	0.00	88.9
Single-earner couple (with NSA/JSP)	5.84	70.20	-22.24	-42.12	8.3
Single-earner couple	47.64	70.20	-22.55	0.00	67.9
Single-earner couple, 1 child (with NSA/JSP)	14.24	70.20	-22.24	-33.72	20.3
Single-earner couple, 1 child	51.61	70.20	-18.59	0.00	73.5
Single-earner couple, 2 children (with NSA/JSP)	16.95	70.20	-19.53	-33.72	24.1
Single-earner couple, 2 children	51.61	70.20	-18.59	0.00	73.5
Dual-earner couple	81.41	105.30	-23.90	0.00	77.3
Dual-earner couple, 1 child	53.40	105.30	-23.90	-28.00	50.7
Dual-earner couple, 2 children	51.10	105.30	-26.19	-28.00	48.5

Note: Tax/transfer parameters as at July 2023. The NMW increase retained is calculated as the change in disposable income as a proportion of the wage increase. Other assumptions as per Table 8.4.

Source: Fair Work Commission modelling.

**Chart 8.3: Growth in real weekly household disposable income for selected NMW-reliant households, index**

Note: Tax/transfer parameters and NMW rate as at July of each year. Other assumptions as per Table 8.4. Between July 2013 and July 2014, the income-free threshold for NSA/JSP increased. Real weekly household disposable income is adjusted with reference to the June quarter CPI.

Source: ABS, *Consumer Price Index, Australia*, March 2024; Fair Work Commission modelling.

Note: Poverty lines are based on estimates of median equivalised household disposable income in 2017–18 for December 2018 and 2019–20 for December 2022 and December 2023, adjusted for movements in household disposable income per head as calculated by the Melbourne Institute of Applied Economic and Social Research and for household composition using the modified OECD equivalence scale. C10 and C4 are minimum award rates set under the *Manufacturing and Associated Industries and Occupations Award 2020*. AWOTE data are expressed in original terms.

Assumptions: Tax-transfer parameters as at December 2018, December 2022 and December 2023. Wage rates for 2018: NMW = \$719.20 pw, C10 = \$837.40 pw, C4 = \$1005.90 and AWOTE of full-time adult employees = \$1605.50 pw. Wage rates for 2022: NMW = \$812.60 pw, C10 = \$940.90 pw, C4 = \$1130.30 pw and AWOTE of full-time adult employees = \$1807.70. Wage rates for 2023: NMW = \$882.80 pw, C10 = \$995.00 pw, C4 = \$1195.30 pw and AWOTE of full-time adult employees = \$1888.80. Other assumptions as per Table 8.4.

Note: Low-paid adult employees were defined as those paid below two-thirds of median hourly earnings in the HILDA data. Adult employees earning less than \$24.55 per hour are considered low paid (16.5 per cent of adult employees). Proportions for each characteristic sum to 100.

Individuals that reported both collective agreement and individual arrangement as their method of setting pay were reclassified to individual arrangement.

# 13. Indicators of financial stress

**Table 13.1: Financial stress experienced by all employee households**

Financial stress indicators	2018	2019	2020	2021	2022
	(%)	(%)	(%)	(%)	(%)
Unable to raise \$3000/\$4000* in a week for something important	5.0	4.8	4.6	3.8	4.6
Could not pay electricity, gas or telephone bills on time	7.4	7.4	4.9	5.2	5.0
Could not pay the mortgage or rent on time	4.0	4.0	3.2	3.1	3.3
Pawned or sold something	2.5	2.8	1.9	1.6	2.4
Went without meals	2.0	2.3	1.4	1.7	1.8
Could not afford to heat home	1.7	1.8	1.0	1.1	1.3
Sought assistance from welfare/community organisation	1.1	1.1	1.3	1.0	1.3
Sought financial help from friends or family	7.3	7.3	3.9	4.6	5.4
Any stress	14.7	15.2	12.1	11.1	12.7
Low stress (1–2)	10.5	10.7	9.6	8.2	9.5
Moderate stress (3–4)	3.1	3.5	1.8	2.2	2.2
High stress (5 or more)	1.1	1.0	0.7	0.7	1.0
Observations	4988	5117	4970	4883	4812

Note: Employee households are those households whose main source of income is from wages or salary. Both partners in a couple family household, the lone parent in a lone parent household and the lone person of a lone person household must report financial stress for that particular household to be considered as such. Observations from multi-family households, other related family households and group households are excluded. \*Amount is \$3000 for Waves 18 to 19, and \$4000 for Wave 20 to 22.

Source: *Household, Income and Labour Dynamics in Australia Survey, Waves 18–22.*

**Table 13.2: Financial stress experienced by low-paid employee households**

Financial stress indicators	2018	2019	2020	2021	2022
	(%)	(%)	(%)	(%)	(%)
Unable to raise \$3000/\$4000* in a week for something important	13.3	12.2	9.6	8.3	10.6
Could not pay electricity, gas or telephone bills on time	15.4	16.4	10.0	10.7	11.6
Could not pay the mortgage or rent on time	7.9	9.6	6.1	6.2	6.1
Pawned or sold something	4.7	6.4	4.8	3.2	5.3
Went without meals	3.8	5.5	3.1	3.4	3.8
Could not afford to heat home	4.1	3.9	2.2	2.0	3.0
Sought assistance from welfare/community organisation	3.9	2.6	3.8	2.9	4.9
Sought financial help from friends or family	13.9	14.2	9.0	8.2	12.3
Any stress	29.0	31.6	24.0	20.3	26.9
Low stress (1–2)	18.1	20.3	18.3	14.1	19.2
Moderate stress (3–4)	7.8	9.1	3.6	4.5	5.0
High stress (5 or more)	3.1	2.2	2.1	1.7	2.7
Observations	981	1022	1011	987	1039

Note: Employee households are those households whose main source of income is from wages or salary. Both partners in a couple family household, the lone parent in a lone parent household and the lone person of a lone person household must report financial stress for that particular household to be considered as such. Observations from multi-family households, other related family households and group households are excluded. Low-paid employee households are defined as those households in the bottom quintile of equivalised disposable household income for employee households. Disposable household income is equivalised using the 'modified OECD' method where each person in the household is given a score (1 for the first adult, 0.5 for subsequent adults and 0.3 for each child under the age of 15) and the income is divided by the sum of these scores. \*Amount is \$3000 for Waves 18 to 19, and \$4000 for Wave 20 to 22.

# 14. Forecasts

**Table 14.1: Mid-Year Economic and Fiscal Outlook 2023–24, international GDP growth forecasts**

	2022 (outcomes)	2023 (forecasts)	2024 (forecasts)	2025 (forecasts)
World	3.4	3	3	3¼
Major trading partners	3.0	3½	3¼	3½

Note: World and other East Asia growth rates are calculated using GDP weights based on purchasing power parity (PPP), while growth rates for major trading partners are calculated using Australian goods and services export trade weights.

Source: Australian Government (2023), *Mid-Year Economic and Fiscal Outlook 2023–24*, December, p. 34.

**Table 14.2: IMF real GDP growth projections**

	2023 (outcomes)	2024 (projections)	2025 (projections)
Australia	2.1	1.5	2.0
Advanced economies	1.6	1.7	1.8
World	3.2	3.2	3.2

Note: Year-on-year percentage changes shown. World and domestic economy growth rates are calculated using GDP weights based on PPP. n/a=not available.

Source: IMF (2024), *World Economic Outlook Update*, April.

**Table 14.3: Mid-Year Economic and Fiscal Outlook 2023–24, domestic economy forecasts<sup>(a)</sup>**

	Outcomes	Forecasts	
	2022–23	2023–24	2024–25
Real gross domestic product	3.1	1¾	2¼
Household consumption	5.0	½	2
Dwelling investment	–3.9	–2	1
Total business investment <sup>(b)</sup>	8.2	2½	–½
Mining investment	1.6	5	–5
Non–mining investment	10.4	2	1
Private final demand <sup>(b)</sup>	4.1	¾	1½
Public final demand <sup>(b)</sup>	2.4	2½	¾
Change in inventories <sup>(c)</sup>	–0.2	–½	¼
Gross national expenditure	3.4	¾	1½
Exports of goods and services	6.8	7½	5
Imports of goods and services	9.3	4½	3
Net exports <sup>(c)</sup>	–0.1	1	¾
Nominal gross domestic product	9.8	4¼	2¼
Prices and wages			
Consumer price index <sup>(d)</sup>	6.0	3¾	2¾
Wage price index <sup>(d)</sup>	3.6	4	3¾
GDP deflator	6.6	2½	0
Labour market			
Participation rate <sup>(e)</sup>	66.9	66¾	66¾
Employment <sup>(d)</sup>	3.2	1½	1
Unemployment rate <sup>(e)</sup>	3.6	4¼	4½
Balance of payments			
Terms of trade <sup>(f)</sup>	–0.5	–6¼	–9¾
Current account balance (per cent of GDP)	1.1	½	–2
Net overseas migration <sup>(g)</sup>	510 000	375 000	250 000

Note: The exchange rate is assumed to remain around its recent average level—a trade-weighted index of around 60 and a \$US exchange rate of around 65 US cents. Interest rates are informed by the Bloomberg survey of market economists. World oil prices (Malaysian Tapis) are assumed to remain around US\$96/barrel.

(a) Percentage change on preceding year unless otherwise indicated.

(b) Excluding second-hand asset sales from the public sector to the private sector.

(c) Percentage point contribution to growth in GDP.

(d) Through-the-year growth rate to the June quarter.

(e) Seasonally adjusted rate for the June quarter.

(f) Key commodities are assumed to decline from elevated levels over four quarters to the end of the September quarter 2024: the iron ore spot price is assumed to decline from a September quarter 2023 average of US\$105/tonne to US\$60/tonne; the metallurgical coal spot price declines from US\$264/tonne to US\$140/tonne; the thermal coal spot price declines from US\$144/tonne to US\$70/tonne. All prices are in free-on-board (FOB) terms.

(g) Net overseas migration is forecast to be 255 000 in 2025–26 and 235 000 in 2026–27. The figure for 2022–23 consists of three quarters of preliminary estimates and one quarter of forecasts

**Table 14.4: RBA economy forecasts, growth rates**

	Dec-23	Jun-24	Dec-24	Jun-25	Dec-25	Jun-26
Gross domestic product	1.5	1.2	1.6	2.1	2.3	2.4
Household consumption	0.1	0.1	1.3	2.6	2.8	2.7
Dwelling investment	-3.1	-3.2	0.2	0.2	0.9	1.8
Business investment	8.3	1.5	0.7	1.7	2.0	2.2
Public demand	4.6	3.2	1.5	2.1	3.0	3.2
Gross national expenditure	1.3	1.6	1.9	2.3	2.6	2.6
Major trading partner (export-weighted) GDP	3.4	2.9	3.2	3.3	3.0	2.9
Imports	3.5	1.1	4.2	3.9	4.2	4.5
Exports	4.2	0.8	2.7	2.8	2.9	3.2
Terms of trade	-3.9	-3.3	-4.1	-1.4	-1.4	-1.3
Employment	3.0	2.1	1.4	1.2	1.3	1.4
Unemployment rate*	3.9	4.0	4.2	4.3	4.3	4.3
Hours-based underutilisation rate*	5.0	5.3	5.6	5.8	5.9	5.9
Wage price index	4.2	4.2	3.8	3.6	3.4	3.3
Nominal (non-farm) average earnings per hour	6.0	7.0	4.3	4.4	4.1	4.0
Real household disposable income	0.3	0.8	2.9	3.4	2.1	2.3
Trimmed mean inflation	4.2	3.8	3.4	3.1	2.8	2.6
Consumer Price Index	4.1	3.8	3.8	3.2	2.8	2.6
Labour productivity**	-0.6	1.8	0.8	1.3	1.2	1.1
Household savings rate^	3.2	3.2	4.5	4.0	3.9	3.8
Real Wage Price Index#	0.1	0.4	0.0	0.4	0.6	0.6
Real average earnings per hour (non-farm)	1.9	3.1	0.5	1.1	1.3	1.4

Note: Percentage changes over the year to the quarter. Forecasts finalised on 1 May 2024. The cash rate is assumed to move broadly in line with expectations derived from surveys of professional economists and financial market pricing. The daily exchange rate (TWI) is assumed to be unchanged at its current level going forward. Oil prices are assumed to remain constant at the current price over the current quarter. For the rest of the forecast period oil prices are expected to remain around the price implied by the six-month-forward rate. The population assumption draws on a range of sources, including partial indicators from the Australian Bureau of Statistics, migration policies, and estimates made by the Australian Government. Forecasts are rounded to the first decimal point. Lighter shaded regions are historical data. \*Average rate in the quarter. \*\* GDP per hour worked (non-farm). ^Household savings rate refers to the ratio of household saving (disposable income minus consumption) to household disposable income, net of depreciation. #Real Wage Price Index and non-farm average earnings per hour worked are both deflated by Consumer Price Index.

# 17. Business surveys

In the Annual Wage Review 2015–16 Decision, the Expert Panel noted that:

*Official statistics on the situation of small business come with a substantial time lag. We accept that in these circumstances, the information provided by business surveys is useful. In particular, we note the assessment by the Australian Government and the RBA that information from the main business surveys (by ACCI, NAB and Sensis) have proved to be quite reliable predictors of output and employment growth. [2016 FWCFB 3500 at para. 298]*
